Section 1. Otology & Neurotology

- Anatomy and Clinical Physiology of the Organs of Hearing and Balance
- Otopathology
- Diagnosis and Physical Examination in Otology and Neurotology
- Electrophysiology: General Principles and Clinical Applications
- Diseases of the External Ear
- General Principles of Middle Ear Pressure Regulation: Eustachian Tube Function and Dysfunction
- Otitis Media with Effusion
- Tympanic Membrane Retractions: Classification and Management
- Indications for Myringotomy and Tympanostomy Tube Placement
- Chronic Otitis Media Without Cholesteatoma
- "Tympanoplasty: Underlay, Overlay & Inlay" and "The Flexible Approach: Pathology Guided Pathogenesis Oriented Middle Ear Surgery"
- The Cholesteatoma: From Principles to Practice
- Surgical Treatment of Cholesteatoma: Basic Techniques
- The Concept of Chronic Silent Otitis Media: From the Diagnosis to the Clinical Impact
- Exploratory Tympanotomy: A Diagnostic Tool and Treatment Option
- Complications of Chronic Suppurative Otitis Media
- Otosclerosis: Pathology, Clinical Diagnosis and Treatment
- Otosclerosis: Surgical Treatment
- An Overview of Sensorineural Hearing Loss: Past, Present, and Future
- Congenital Sensorineural Hearing Loss
- Acquired Sensorineural Hearing Loss: Infectious and Inflammatory Causes
- Hereditary Hearing Loss
- Ototoxicity & Otoprotection: Principles and Protocols
- Immunomediated Inner Ear Diseases: Clinical Diagnosis and Treatment
- Noise-Induced Hearing Loss
- Presbycusis: When Hearing Loss Becomes Hearing Deficiency
- Sudden Deafness: Workup & Management
- Hearing Aids: Form and Function
- Hearing Aids: Prescription and Outcome Assessment
- Implantable & Semi-implantable Hearing Aids: Current Indications and Results
- Cochlear Implants: Surgical Technique and Complications
- Facial Palsy: Etiology, Topodiagnosis and Treatment
- Temporal Bone Trauma
- Tinnitus: Overview, Clinical investigation & Treatment Modalities
- Balance Disorders: An Overview
- Menière’s Disease & Syndrome
- Benign Paroxysmal Positional Vertigo
- Vestibular Neuronitis & Labyrinthitis
- Central Vertigo
• Middle Ear/Inner Ear Interaction: The Principles and Indications of Intratympanic Therapy
• Principles of Vestibular Rehabilitation
• Surgical Treatment of Vertigo
• Endolymphatic Sac Surgery
• Vestibular Schwanommas: Differential Diagnosis and Treatment Modalities
• Surgical and Clinical Pathology of the Petrous Apex

Section 2. Rhinology/ Sinusology
• Important Sinonasal Anatomy with Endoscopic Correlations
• Important Sinonasal Anatomy with Radiologic Correlations
• Sinonasal Physiology and Chronic Rhinosinusitis Pathophysiology
• Chronic Rhinosinusitis without Nasal Polposis
• Chronic Rhinosinusitis with Nasal Polposis
• Allergic Fungal Rhinosinusitis
• Aspirin-exacerbated Respiratory Disease
• Pituitary Tumors
• Inverting Papilloma
• Management of Sinonasal Malignancies
• CSF Leaks and Skull Base Defects
• Contemporary Management of Epistaxis
• Nasal Obstruction and Sleep Disordered Breathing
• Destructive Lesions of the Sinonasal Tract
• Olfactory Disorders

Section 3. Pharyngology/ Bronchoesophagology/ Laryngology
• Anatomy and Physiology of Swallowing
• Assessment of the Dysphagic Patient
• Management of the Dysphagic Patient
• Cough/Paradoxical Vocal Fold Movement
• Laryngopharyngeal Stenosis
• Upper Airway Obstruction (includes sleep apnea)
• Airway Management (includes tracheotomy and intubation)
• Anatomy and Physiology of Voice Production
• Assessment of the Voice Patient (includes professional voice)
• Inflammatory Conditions of the Larynx (includes infections, reflux)
• Benign Vocal Fold Lesions
• Vocal Fold Paralysis/Paresis
• Voice Therapy
• Phonemicrosurgery
• Office-based Procedures
• Neurologic Diseases Affecting Voice and Swallowing
• Lasers in Laryngology
• Functional Voice Disorders (includes MTD)
• Voice Across the Age Continuum
- Premalignant and Early Glottic Lesions

**Section 4. Head and Neck Disease and Surgery**
- Principles of Surgical Management of Head and Neck Cancer
- Basic Biology of Head and Neck Cancer: Radiation therapy
- Basic Biology of Head and Neck Cancer: Chemotherapy
- Basic Biology of Head and Neck Cancer: Reconstruction
- Basic Biology of H&N Cancer: Sinonasal
- Oral Cavity Non-malignant
- Oral Cavity Malignant
- Nasopharynx
- Oropharynx: Non-surgical management
- Oropharynx: Surgical (including Robotic)
- Larynx and Hypopharynx: Surgery - Traditional
- Larynx and Hypopharynx: Endoscopic Surgery
- Larynx and Hypopharynx: Non-surgical Management
- Thyroid and Parathyroid: Thyroid Cancer Eval/Surg Mgt
- Thyroid and Parathyroid: Robotic Surgery for Thyroid Ca
- Thyroid and Parathyroid: Non-surgical Management of TC
- Thyroid and Parathyroid: Parathyroid
- Salivary Glands
- Neck
- Skin Cancer
- Sarcomas
- Soft Tissue
- Bone and Cartilage
- Neurogenic Tumors

**Section 5. Pediatrics**
- Pediatric Otolaryngology Growth, Development and Current Status: 2014
- Research and Publication in Pediatric Otorhinolaryngology
- Otolaryngologic Manifestations of Metabolic Disease
- Early Assessment and Management of Pediatric Hearing Loss
- Malformations of the Inner Ear
- Hearing Rehabilitation in Congenital Aural Malformations
- Acute and Recurrent Otitis Media in Children: Current Evidence
- Otitis Media with Effusion
- Cholesteatoma and Tympanoplasty in Children
- Dizziness in Childhood
- Congenital Malformations of the Nose
- Pediatric Rhinosinusitis
- Nasal Polyps in Children
- Epistaxis in Childhood
- Craniofacial Malformations
- Cleft Palate and Velopharyngeal Disfunction
- Pediatric Maxillofacial Trauma
- Diseases of the Tonsils and Adenoids
- Obstructive Sleep Apnea in Children
- Approach to the Child with Stridor
- Congenital Pathology of the Larynx and Trachea
- Acquired Pathology of the Larynx and Trachea in Childhood
- Voice Disorders in Childhood
- Speech-Language Development and Related Disturbances in Children
- Tracheostomy, Home Care and Decannulation
- Caustic Ingestion and Foreign Bodies in the Aerodigestive Tract
- Intrinsic Diseases of the Esophagus, Reflux and Swallowing Disorders
- Congenital Cysts, Fistulae and Vascular Lesions of the Neck
- Acquired Lesions of the Neck in Children
- Pediatric Neck Infections
- Diseases of the Salivary Glands in the Child

### Section 6. Facial Plastic/ Reconstructive Surgery

- Wound Healing, Surgical Technique, Suture, Instruments
- Facial Analysis & Facial Anatomy
- Facelift & Necklift
- Browlift
- Blepharoplasty
- Implants
- Injectables and Fillers
- Skin Resurfacing (Dermabrasion, Lasers, Pigmented)
- Hair Restoration
- Rhinoplasty Analysis
- Primary Open Rhinoplasty (include ethnic rhino)
- Endonasal Rhinoplasty (include ethnic rhino)
- Revision Rhinoplasty
- Functional Nasal Surgery (Perfs)
- Soft Tissue Injury
- Facial Fractures
- Cleft Lip
- Cleft Palate and VPI
- Craniofacial Surgery
- Microtia & Otoplasty
- Vascular Anomalies
- Skin Grafts & Minimally Invasive Closure
- Local Flaps
- Regional Flaps (Tissue Expanders)
- Free Tissue Transfer
- Facial Reanimation
